

ORBIS Product Cost Calculator Smart Costing directly in SAP

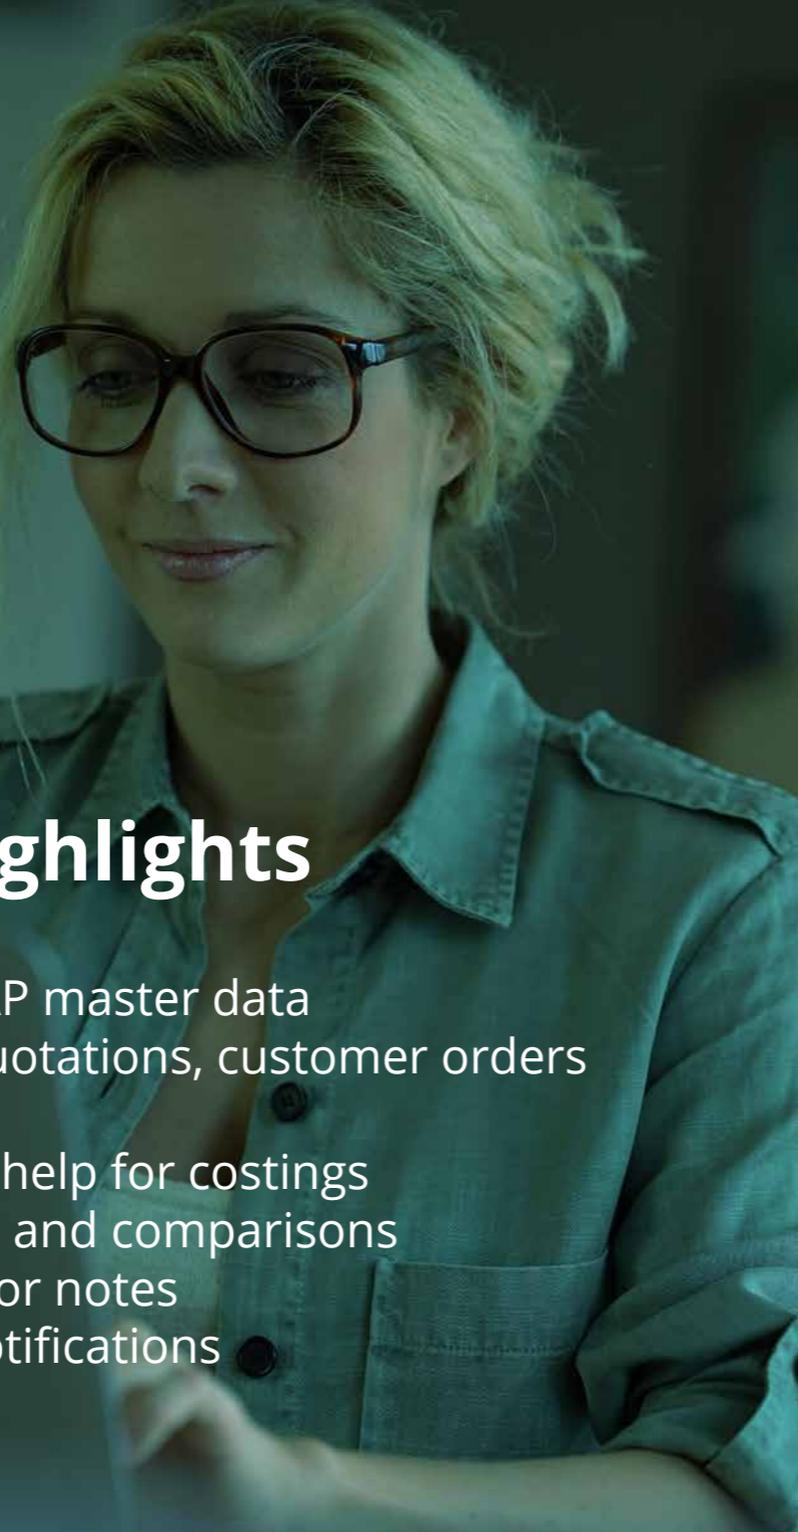

Greater efficiency in your costing process

Our **ORBIS Product Cost Calculator** (ORBIS PCC) is a piece of **costing software** that was developed as an **SAP add-on** and uses ABAP as its basis. Do you use an ERP system from SAP? Our costing tool enables **cross-company code costing** directly in SAP ERP with a **standardized pricing procedure**.

ORBIS Product Cost Calculator An SAP add-on for your costing process

PCC

The functional highlights

- Costing with and without SAP master data
- Automated generation of quotations, customer orders and master data
- Extensive, individual search help for costings
- Costing templates, versions, and comparisons
- Attachments of documents or notes
- Integrated workflow with notifications

What **benefits** does the ORBIS PCC offer?

Save time

Transparency

Consistent

**Homogeneous
database**

**No information
gaps**

**Low propensity
for errors**

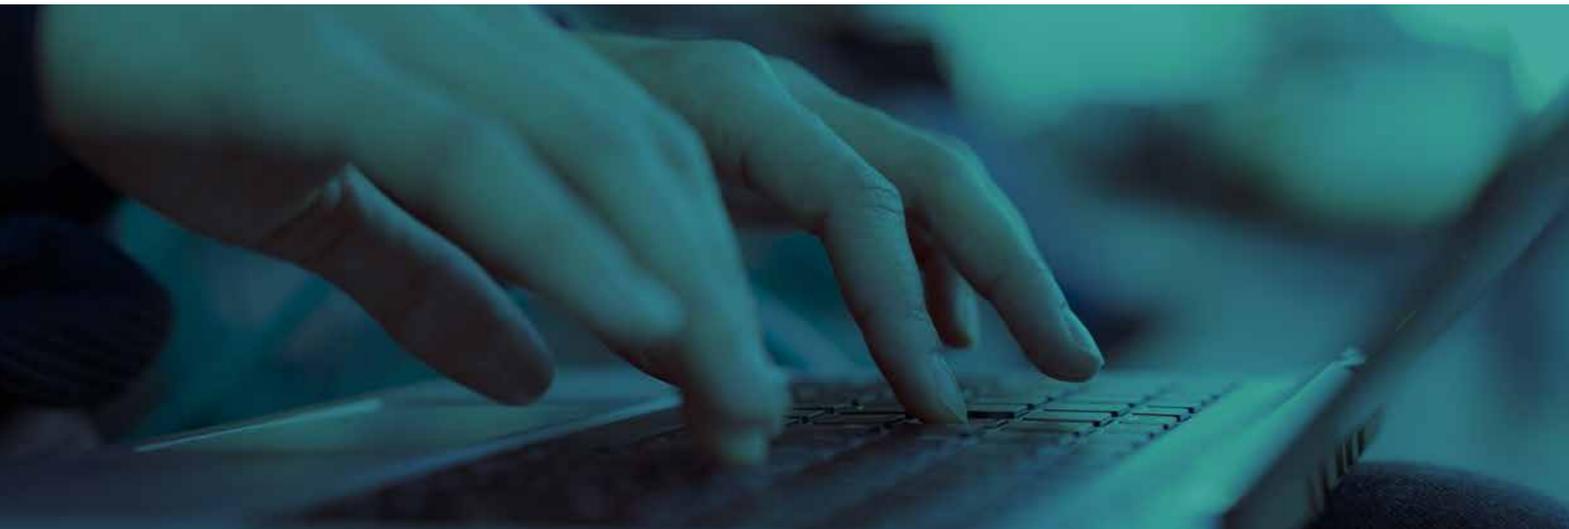

PCC

The ORBIS PCC for your **Quotation costing**

Especially for products involving a large number of variants, you have to **cost prices individually** and write **reliable quotations** to convince the customer of the service you're providing. Since no master data is needed for costing in the ORBIS PCC, you can send quotations far more quickly to potential customers and thus increase the chance of successfully concluding a contract.

The **benefits** at a glance

- + Quicker quotations for the customer
- + Enhanced efficiency in the sales process
- + Transparent and traceable preparation of quotations
- + No media discontinuity due to 100% SAP integration

"With the ORBIS PCC as a central hub, we're creating the prerequisite for fully integrated and transparent quotation generation in SAP from a single source. For its implementation, we put our trust in ORBIS' process and consulting expertise."

Gerd Vettters, Head of Organization and IT, HIGHVOLT Prüftechnik Dresden GmbH

PCC

The ORBIS PCC for your **Costing during development**

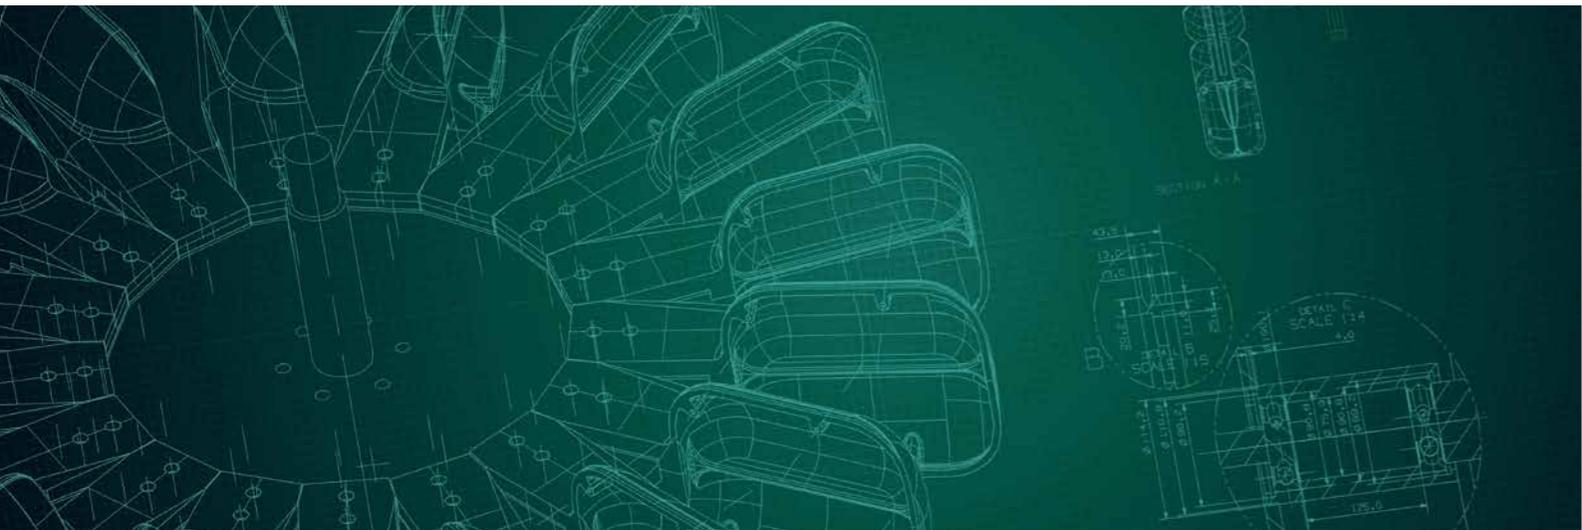

More variants automatically lead to **more production options**, and thus to **different production costs** and complex costing. But what does this mean for your cost engineering operations? Cost engineers often have to work with costing items for which neither master data exists in the SAP system nor prices are known for calculating total costs during development.

The **benefits** at a glance

- + Departmental and cross-departmental costing
- + Standardization in the costing process
- + Transparency of all production costs
- + No media discontinuity due to 100% SAP integration

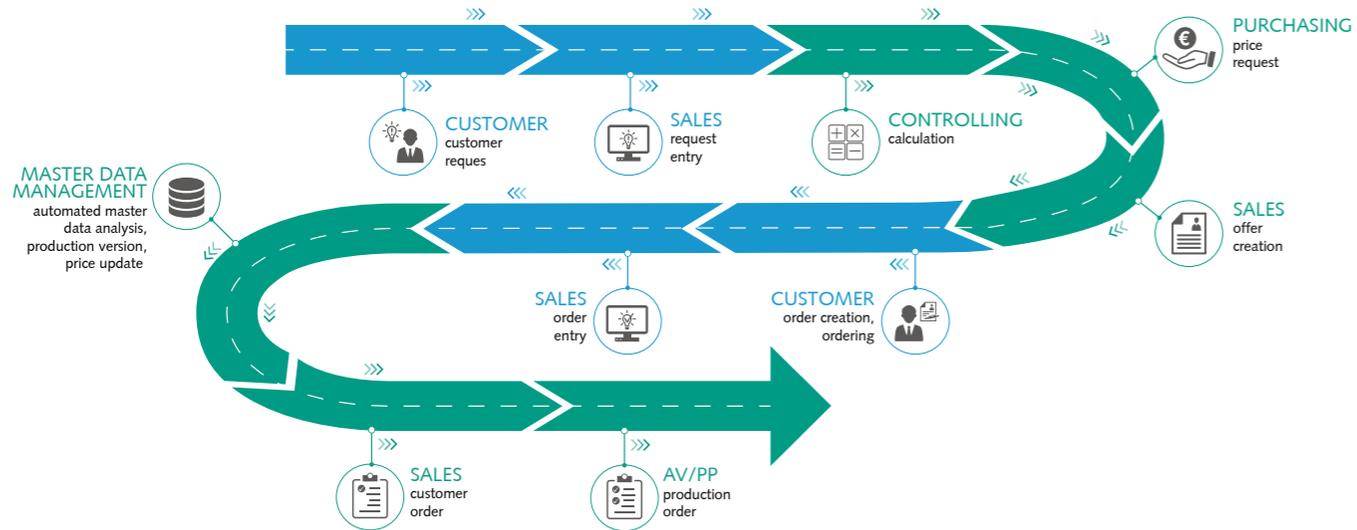

“ With the Product Cost Calculator integrated in SAP, we achieve more speed, quality and transparency in the development-accompanying costing. We detect excess cost overruns as early as during the design process, thereby giving us more time for our core tasks.”

Markus Hahn, Head of Product Cost Management at EMAG Holding GmbH

PCC

Example of quotation process in ORBIS PCC

3 steps to ORBIS PCC

- 1 Delivery and installation
- 2 Customization of standard features
- 3 Key user training

Do you still have doubts? Simply test the ORBIS PCC with your own data yourself!
